### CORRECTION

An error was made in the redaction of an article on Dermatopathic Lymphadenopathy by Robert A. Cooper, M.D., and associates, which appeared in the March issue of CALIFORNIA MEDICINE. In the third line of the first paragraph on page 171, the abbreviation PAS was mistakenly extended to "para-aminosalicylic acid." On galley proof the author corrected the extension to read "periodic acid-Schiff," but through oversight the correction was not made before the article appeared in print.
